# **Long-term Global Navigation Satellite System (GNSS) retrievals of total column water vapour**

Roeland Van Malderen & Eric Pottiaux

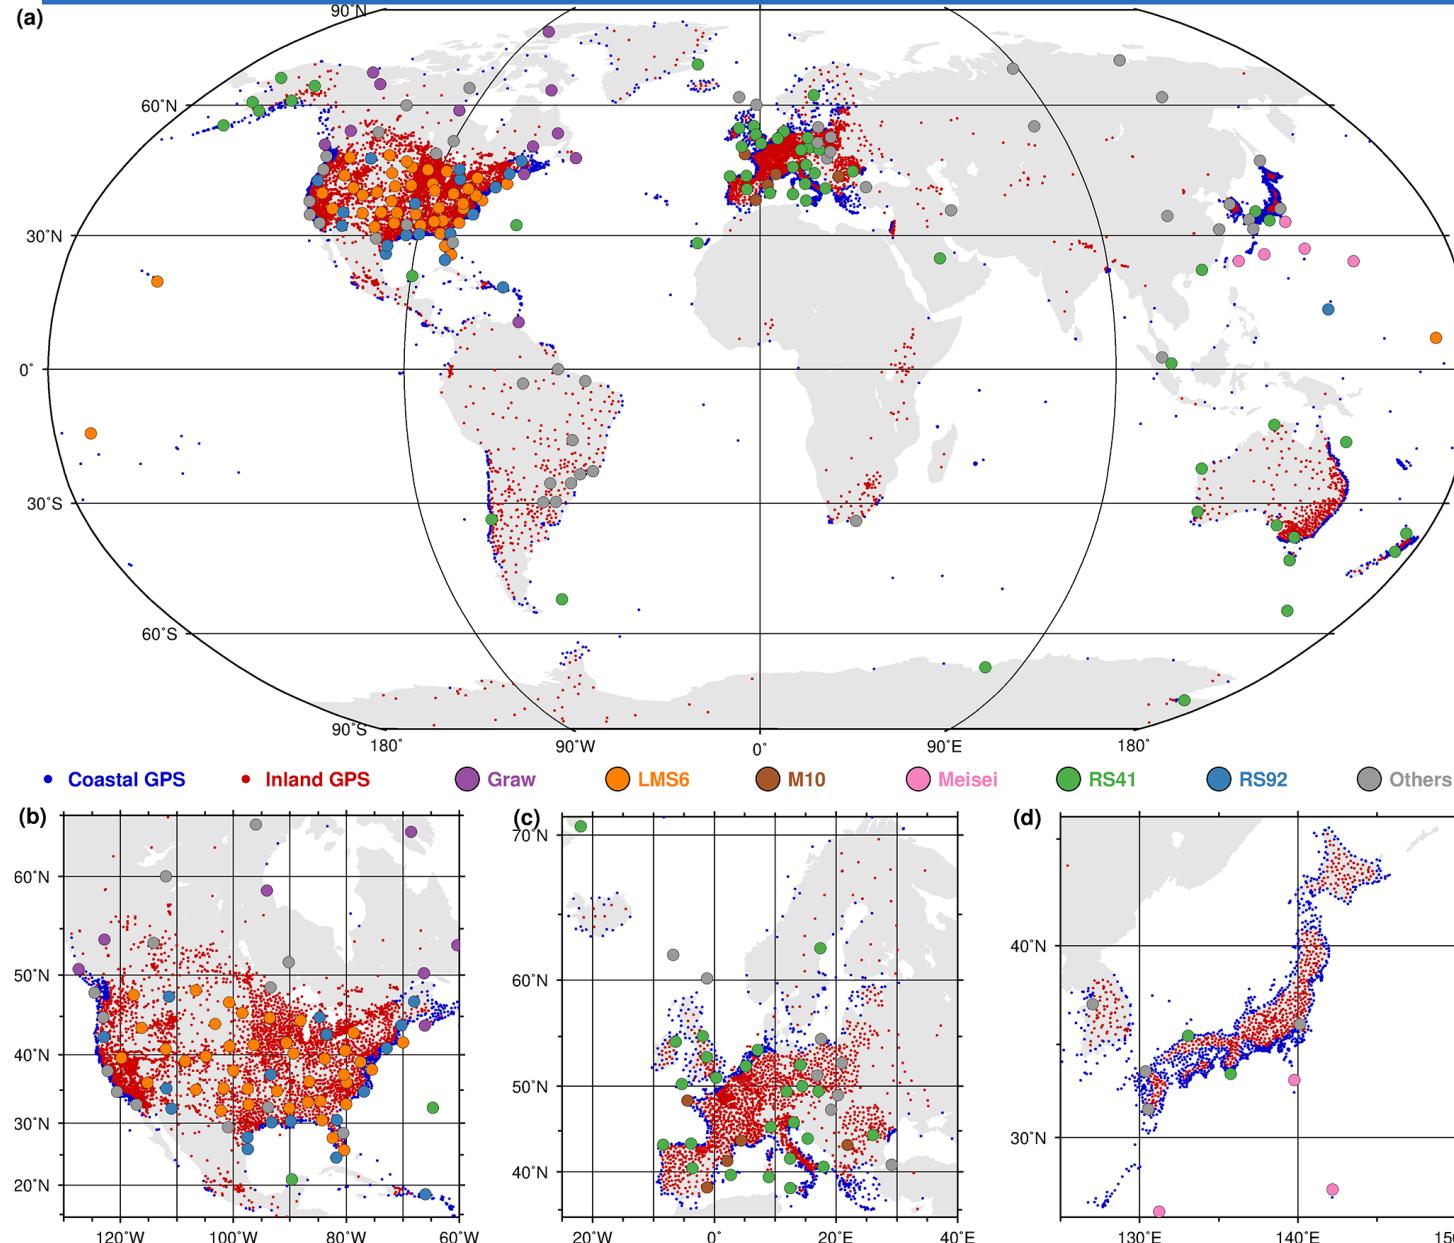

- delay of signal between a Global Navigation Satellite System (GNSS) satellite & ground-based receiver along its path by
  - ionosphere
  - “neutral” atmosphere
    - ✓ density of dry air (“hydrostatic” delay → surface pressure)
    - ✓ water vapour (“wet” delay → humidity weighted mean temperature)
- Zenith Wet Delay (ZWD) = Zenith Total Delay (ZTD)
  - Zenith Hydrostatic Delay (ZHD)
- + all-weather, high-precision, high temporal resolution (every 5 minutes), and relatively cheap technique, since mid 90s
  - coarse spatial resolution, additional meteorological information, inhomogeneities

# Data availability: global

- 120 global stations, with data since mid 1990s  
Van Malderen et al., RS, 2022

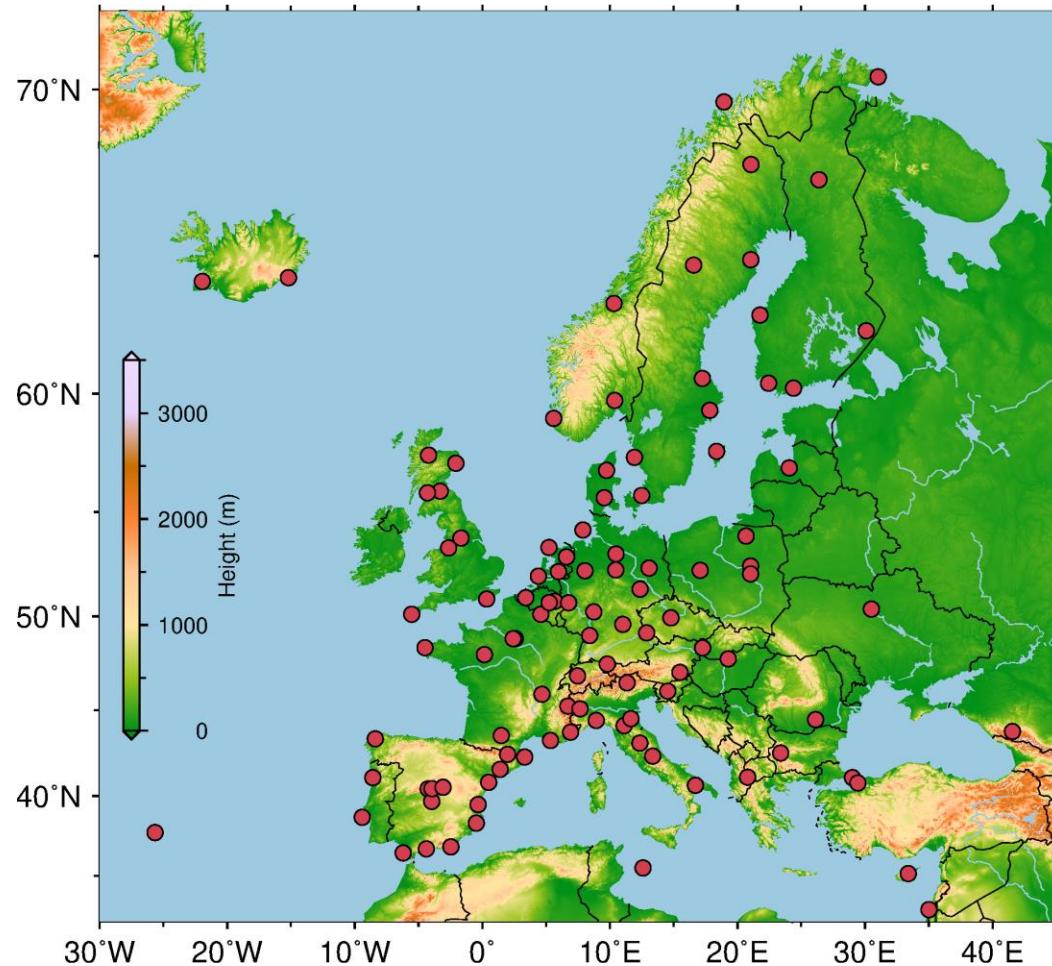

# Data availability: global

- > 10000 global GNSS stations in 2020!

Yuan et al., ESSD, 2023

# Data availability: Europe

- > 100 European stations, with data since mid 1990s

Yuan et al., ACP, 2023

## Belgium

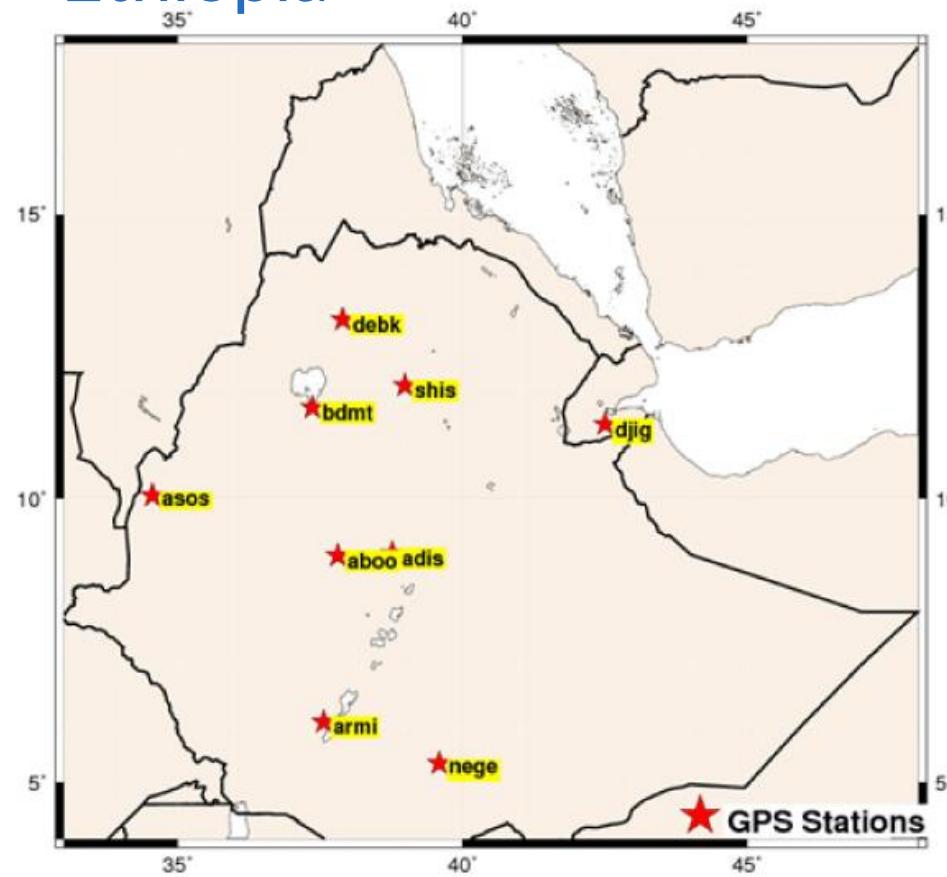

- GNSS stations within the CORDEX.be high-resolution domain
- GNSS stations were used on humidity field assessment of high-resolution climate model runs in Belgium (ALARO, COSMO-CLM, and MAR)
- Those models showed a remarkable good correlation with observations and are able to represent properly the diurnal and annual cycles.

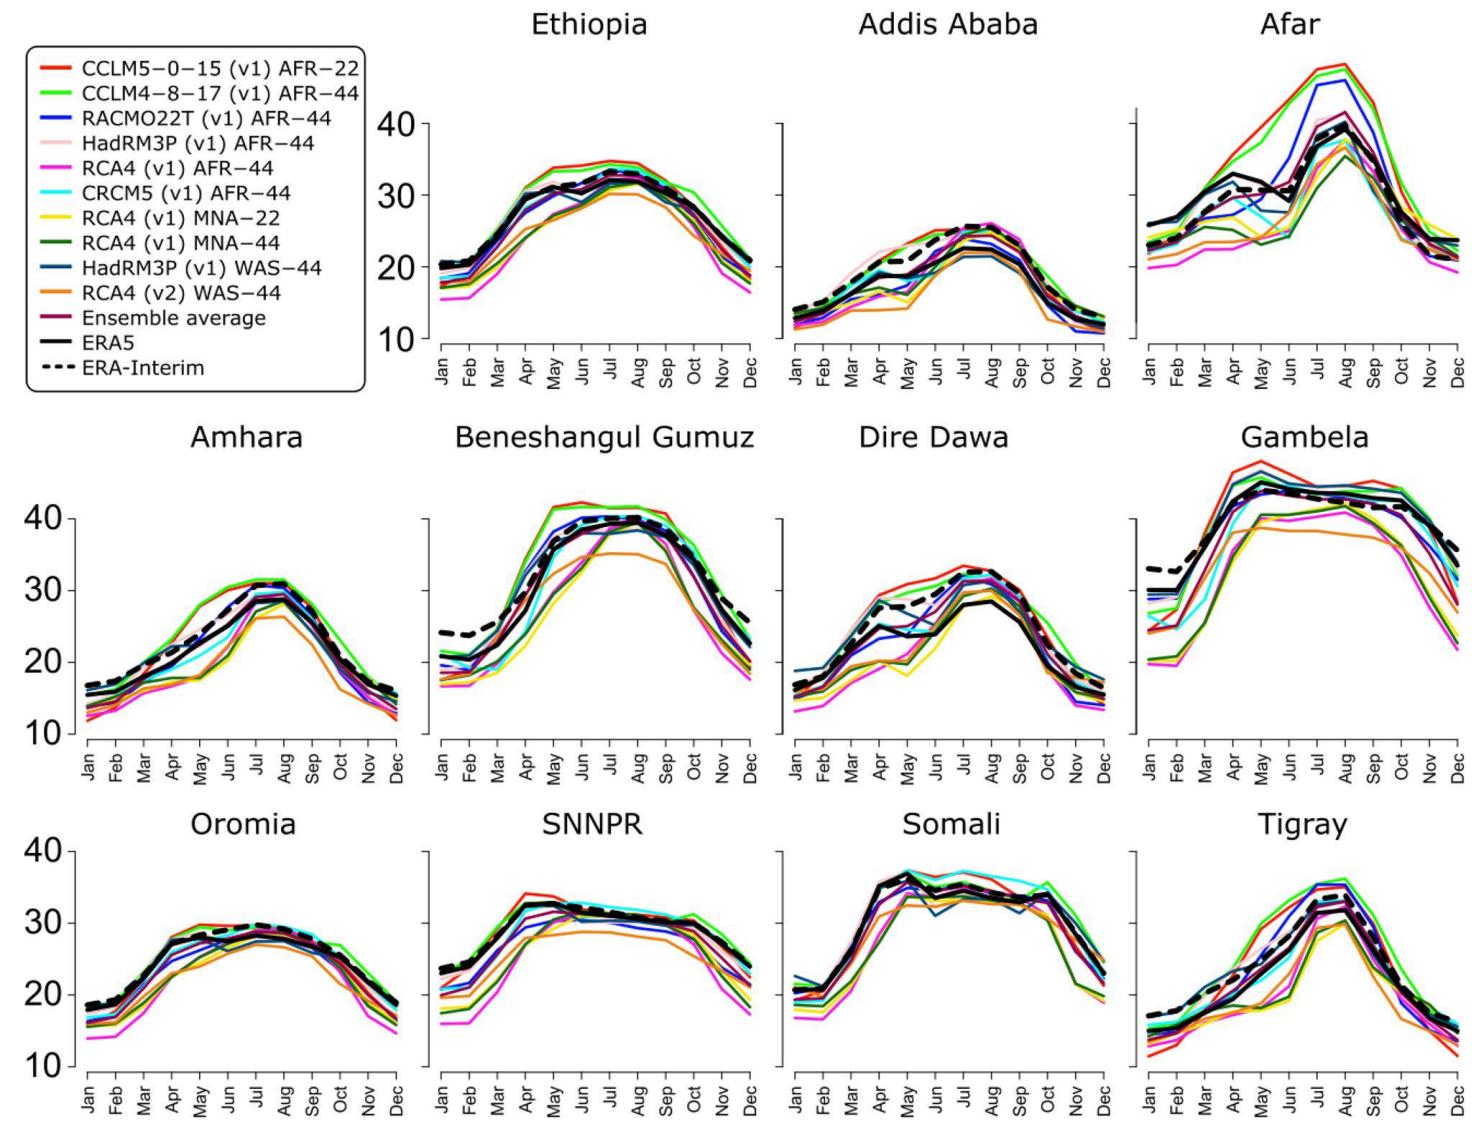

# Data availability: regional

## Ethiopia

- CCLM5–0–15 (v1) AFR–22
- CCLM4–8–17 (v1) AFR–44
- RACMO22T (v1) AFR–44
- HadRM3P (v1) AFR–44
- RCA4 (v1) AFR–44
- CRCM5 (v1) AFR–44
- RCA4 (v1) MNA–22
- RCA4 (v1) MNA–44
- HadRM3P (v1) WAS–44
- RCA4 (v2) WAS–44
- Ensemble average
- ERA5
- ERA-Interim

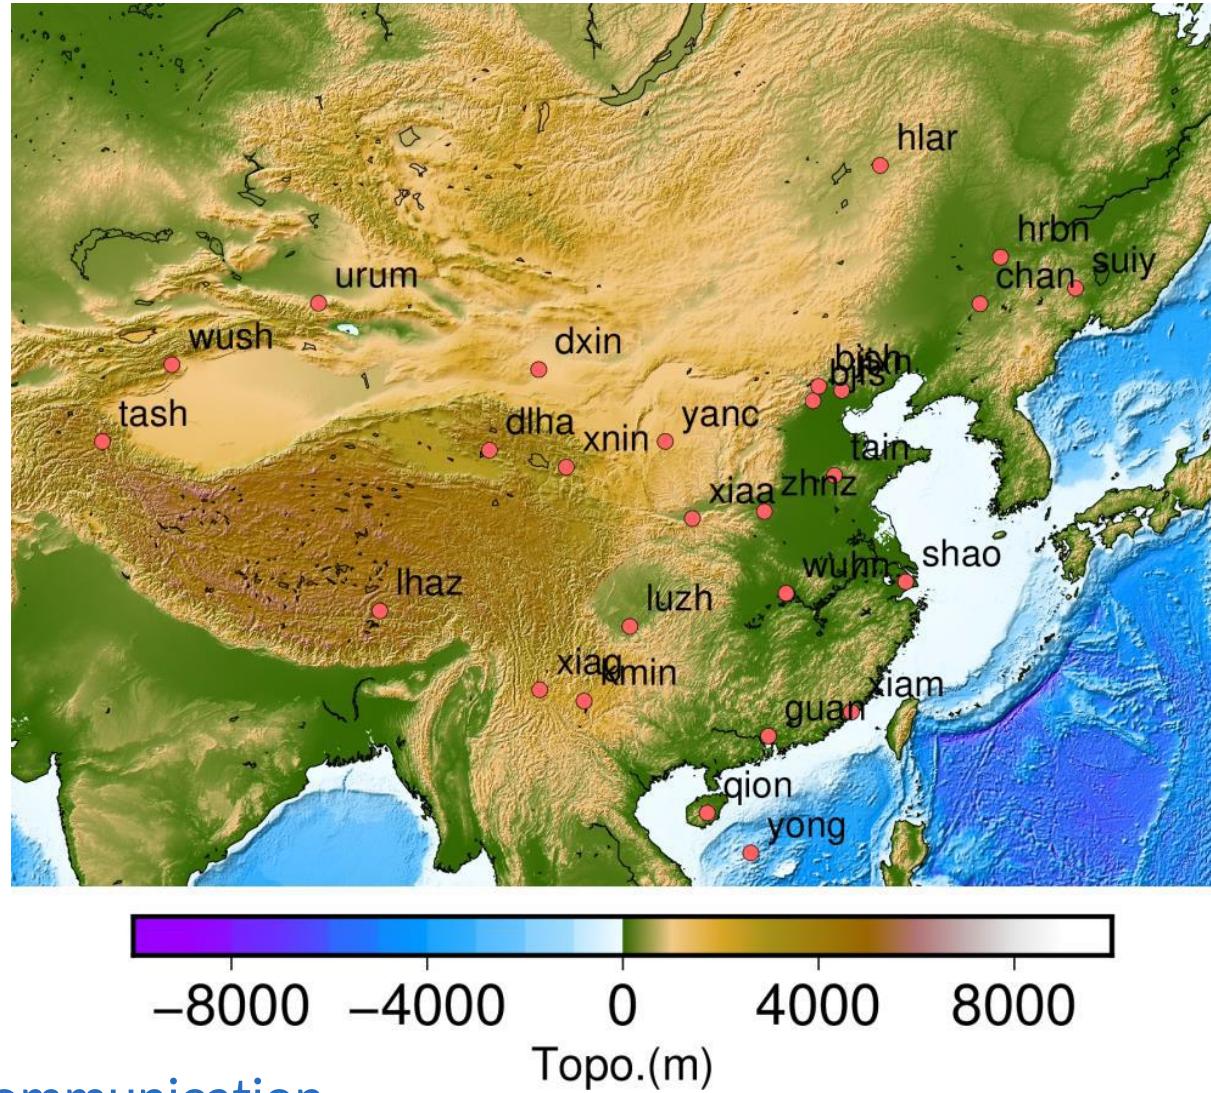

Kawo et al., RS, 2022

Kawo et al., Clim. Dyn., 2023

# Data availability: regional

China

Dai et al., personal communication

- ✓ Lots of long-term, high (temporal) resolution, high accuracy total column water vapour data is available, on different spatial scales
- ✓ Data has been used for intercomparisons (radiosondes, satellite retrievals), reanalyses & climate model validations, trend estimations, links with surface warming (Claussius-Clapeyron relationship) and, to some extent, extreme precipitation
- ✓ Geodetic community is really looking for interactions with climate community

# THANK YOU

The RMI provides reliable public service realized by empowered staff and based on research, innovation and continuity.

Het KMI verleent een betrouwbare dienstverlening aan het publiek en de overheid gebaseerd op onderzoek, innovatie en continuïteit.

L'IRM fournit un service fiable basé sur la recherche, l'innovation et la continuité au public et aux autorités.

Vertrauenswürdige Dienstleistungen für Öffentlichkeit und Behörden begründet auf Forschung, Innovation und Kontinuität.
